# THE MOST TRUSTED BLADE IN THE FIELD FOR 15 YEARS

In 2005 the Havalon story began. Our pursuit to make world-class, surgically sharp blades available for everyday use, has changed the way people think of a knife.

We created an entirely new category of tools within the industry, changed the way hunters process animals, and introduced blades so sharp they became the gold standard by which all other knives are judged.

We aren't saying all this to brag, we are simply marking the accomplishments to this point because now we are focused on bringing our unique level of sharpness to everyone. If you need a sharp knife at work, home, on the lake, or in the woods we have you covered. At Havalon, we believe a sharp knife is not a luxury, it is a necessity.
